

Courage Coins

Pennies are typically forgotten, tossed aside and considered not worth the effort. The *penny* represents another human life that someone has forgotten, tossed aside and found not worth the effort.

The transformation performed with these forgotten coins shows how with a little help, even something that most had given up on can once again start a *new life* and shine brighter than ever.

At *Susann's Custom Jewelers*, pennies are transformed into *Courage Coins* when they are coated with silver or gold and made into a beautiful pendant hanging from an adjustable silver or gold chain. Courage Coins are also available with a diamond and can be *customized* upon request.

Half of the profits from each Courage Coin pendant purchased will go to *New Life Refuge Ministries'* goal of helping a rescued person shine bright again.

Just like the penny, every human life has value.
